## SCENARIO:

“Good Morning, Vietnam!” Witness a typical Air Cav day in Vietnam. Watch our OV-1B Mohawk and “Loach” Scout helicopter search for the “bad guys” under the watchful eye of our deadly “Cobra” helicopter gunship protectively circling overhead. Enemy fire sends the Scout breaking away, and the Cobra starts it’s first of several rocket and gun runs with lots of pyro special effects. The Scout returns for a RECON report and our Forward Air Control “Bird Dog” aircraft appears overhead to call in artillery fire -- more pyro effects. Our “Huey” helicopters are called in “guns blazing” to insert the infantry. A ground infantry assault results in the capture of the “bad guys” followed by a Huey medical evacuation. After a low-level resupply drop by our combat experienced Huey helicopter, the Air Cav Troop departs for another successful mission.

### OV-1B Mohawk

A recon and rocket run from this formidable aircraft opens our show with lots of action and a big bang! Our Mohawk is the only OV-1B flying.

### L-19D/0-1D “Bird Dog”

Our Vietnam-era “Bird Dog” Forward Air Control aircraft is used for controlling our tactical actions, observation and adjusting artillery fire.

### UH-1H “Huey”

Witness our ICON of the Vietnam War, the Huey, perform a combat air assault with guns blazing to deliver its infantry Air Cav troops to take the enemy objective just like these very aircraft did hundreds of times in Vietnam.

### AH-1 “Cobra” Gunship

Be amazed at the maneuverability and “firepower” of the modern Cobra as it suppresses the “enemy” during the unfolding air assault

### OH-6 “Loach”

Watch the tremendous low-level, high speed maneuvering of our Vietnam combat-experienced Scout helicopter as it searches out the elusive “enemy”.

### UH-1 “Med Evac”

Highly developed during Vietnam, watch the “angel” of the battlefield swoop in to quickly retrieve injured soldiers to speed them to prompt medical attention.

### Infantry Air Assault

Witness an infantry air assault by Huey helicopters delivering an Air Cav “Blue Team” quick reaction force that assaults and captures the “bad guys”. See how aerial resupply and MedEvac by the icon Huey helicopter changed the role of mobility and support on the modern battlefield.
